PROFESSIONAL SUMMARY

Results-driven aspiring **Software Developer** with hands-on experience building **responsive, scalable, and API-driven web applications**. Proficient in **React.js, Next.js, JavaScript (ES6+), HTML5, and CSS3**. Demonstrated ability to deliver **full-stack frontend solutions** with emphasis on **performance optimization, component-based architecture, state management, and cross-browser compatibility**.

EDUCATION

SRM Institute of Science and Technology	2024 – 2028
B.Tech in Computer Science and Engineering	CGPA: 8.81 / 10.0

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python, Java, C++, C, SQL
- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Bootstrap, **Responsive Web Design, Cross-Browser Compatibility**
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, REST API Integration, State Management, DBMS, Agile Methodology
- **Developer Tools:** Git, GitHub, Vercel, VS Code, **WebRTC, Canvas API**, npm

PROJECTS

<u>bazaAR – Real-Time Camera-Based Product Visualization</u>	GitHub
<i>React.js, WebRTC, Canvas API, JavaScript</i>	

- Engineered a **real-time product visualization** web application leveraging live camera input to enhance user shopping experience.
- Integrated **WebRTC** for low-latency media streaming and **Canvas API** for high-performance frame rendering and image processing.
- Optimized **UI performance** and **rendering pipeline** through asynchronous operations, reducing frame drop rate and improving responsiveness.
- Architected **modular, reusable components** using **React.js**, improving **code maintainability** and enabling scalable feature expansion.

<u>Kanban Task Board – Workflow Management Application</u>	GitHub
<i>React.js, State Management, CSS3</i>	

- Built a **full-featured task management system** with multi-stage **workflow automation**, drag-and-drop functionality, and task prioritization.
- Implemented advanced **state management** using React hooks for **real-time UI synchronization** and persistent task updates.
- Developed **reusable component library** with fully **responsive layout**, ensuring consistent experience across all device sizes.

<u>Manzar – Movie Discovery & Search Application</u>	GitHub
<i>React.js, REST API, JavaScript, CSS3</i>	

- Developed a **dynamic movie search application** with **REST API integration** to fetch and display real-time data from a third-party movie database.
- Implemented **asynchronous data fetching** with loading state indicators and robust **error handling** for seamless user experience.
- Designed **conditional rendering** patterns and **dynamic UI components** to efficiently handle variable content and edge cases.

<u>React Chatbot Interface – Conversational UI</u>	<i>React.js, JavaScript, CSS3</i>
• Built an interactive chatbot interface with real-time messaging, controlled components , and smooth conversational user experience (UX) .	

- Managed complex **application state** for message threading, input handling, and dynamic rendering of conversational flows.

CERTIFICATIONS

- | | |
|---|--------------------------|
| • Programming in Java – NPTEL, IIT Kharagpur | <i>Elite Certificate</i> |
| • Object-Oriented Programming – NPTEL, IIT Roorkee | <i>Elite Certificate</i> |
